

How to download and view your new Digital Edition

Instructions for MAC users:

1. You will receive an email with a link to download your digital edition. Click the link to open a page that looks like **Figure 1a**. Click on "**Click here**" to download. You will receive a pop-up as shown in **Figure 1b**. Select "**Save File**" and click "**OK**", **Figure 1b**.

2. Your download will begin. (This example shows the download occurs in the selected **Downloads** folder, unless otherwise specified.) Select "**Save**", **Figure 2**.

3. You will have two new files in this folder. One with a size of ZERO and one with a very large file size with a ".part" extension, **Figure 3**. ****If you begin to open this file now, it will be corrupted and you will be unable to view your download. You must wait until the file is fully downloaded as indicated in Figure 4.** You will be certain it is completed because the ".part" file will disappear.

4. Click on the new folder to open. If you have purchased the PC & MAC version, you will have two files appear. Double click on the "**MAC_version.zip**" file to unzip, **Figure 5**.

5. Double click on the "**Offline.app**" file, **Figure 6**. You should get a pop-up like the one in **Figure 7**. Select **Open**. Your screen should go completely white while your digital edition player loads.
