

# How to Install Your Digital Edition

Downloads can take anywhere from 15 minutes to 1 hour depending on the size of the publication/file and how well-oiled your machine is.

## Step 1:

Click on the secure download link sent via e-mail. This will open your internet browser to begin the download process. When prompted, click “Save” and then select the location on your computer where you want to save the file. If the download fails to start, see “A Note for Internet Explorer Users” below.

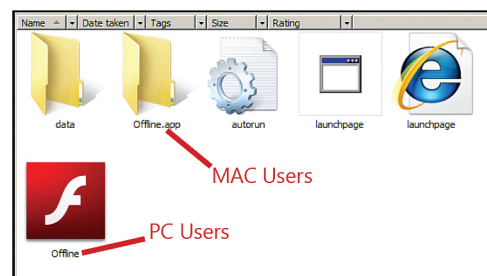

## Step 2:

After the download is complete, go to the location on your computer where you saved it, and click on the icon or file (offline.exe—PC or offline.app—Mac) to open your digital publication. Only proceed to Step 3 if the digital edition fails to launch.

## Step 3:

If the digital edition does not automatically open during Step #2, you may need to unzip the file first. To do this, right click on the file and select “Extract All..” then follow the prompts. Once you’ve extracted the files, open the unzipped folder if they do not automatically appear. Double click on the “Offline” icon—PC users or the “Offline.app” icon—Mac users to launch your digital edition.

\*If you do not have unzipping software installed on your computer, we recommend performing a search for “free unzipping software” on your favorite search engine.

## A Note for Internet Explorer Users

If the download process does not begin after clicking on the link (Step #1), or an “error” message appears before the download is complete, this may be because your “Pop-up Blocker” is enabled. To disable this:

1. Go to the top bar menu and click Tools
2. When the drop-down menu opens, click on Pop-up Blocker
3. Click on the option that opens toward the right: Turn Off Pop-up Blocker
